Cochlear Implants 101 – A Hands On Workshop

DATE: Friday, June 9, 2017

About the Program:
This hands-on workshop will allow speech language pathologists, audiologists and teachers of the deaf to obtain knowledge of the cochlear implant process from candidacy, device selection, accessories, therapy practices and educational placement.

Learning Outcomes – CI 101

After completing this course participants will be able to:

1. Recognize current and evolving candidacy criteria for cochlear implantation
2. Discuss medical/surgical, educational, social and rehabilitative considerations following cochlear implantation
3. Identify available cochlear implant device options
4. Describe the basic principles behind initial stimulation and device programming

To view Cochlear Implants 101 – A Hands On Workshop 2017 Disclosure document for information on speaker’s financial and non-financial interests relevant to the content of their presentation please visit our website at https://www.childrenshearing.org/course-categories/continuing-education
